

## JAERLA Sirtema x MPI 19268

Maturity	= Very early to early
Dormancy	= Long
Foliage development	= Fairly good
Colour of skin	= Yellow
Colour of flesh	= Pale yellow
Shape of tubers	= round-oval to oval
Shallowness of eyes	= Rather shallow
Size of tubers	= Very large to large
Yield	= Medium
Dry matter content	= Very low
Cooking type	= Firm to fairly firm
Suitable for	= Fresh consumption
Resistance against leafroll	= Moderately resistant
Resistance against virus A	= Fairly good resistance
Resistance against virus X	= Fairly good resistance
Resistance against virus Yn	= Moderately resistant
Resistance against leaf blight	= Very susceptible
Resistance against tuber blight	= Fairly good resistance
Wart disease (fysio 1)	= Resistent
Common scab	= Moderately resistant
Resistance against internal bruising	= Good resistance

### Morphological characteristics

- Plant** medium and leaf type foliage structure; stems semi-upright to spreading and medium anthocyanin colouration; medium to large, light to medium green leaves and intermediate to open silhouette; medium to high frequency of flowers, none or very weak anthocyanin colouration inner side flower corolla.
- Tubers** round-oval; yellow, smooth to medium smooth skin; pale yellow flesh; rather shallow eyes.
- Sprouts** medium, ovoid, weak to medium intensity of anthocyanin colouration and weak pubescence of base; medium terminal bud with very weak to weak anthocyanin colouration of tip; medium root tips.
