

## MONALISA Bierma A 1-287 x Colmo

Maturity	= Medium early
Dormancy	= Medium long to long
Foliage development	= Good to fairly good
Colour of skin	= Yellow
Colour of flesh	= Fairly yellow
Shape of tubers	= oval to long-oval
Shallowness of eyes	= Shallow
Size of tubers	= Large
Yield	= Good to medium
Dry matter content	= Low
Cooking type	= Firm to fairly firm
Suitable for	= Fresh consumption
Resistance against leafroll	= Fairly good resistance
Resistance against virus A	= Resistant
Resistance against virus X	= Fairly good resistance
Resistance against virus Yn	= Good resistance
Resistance against leaf blight	= Susceptible
Resistance against tuber blight	= Moderately resistant
Wart disease (fysio 1)	= Resistent
Common scab	= Susceptible
Resistance against internal bruising	= Good resistance

### Morphological characteristics

- Plant** tall and stem type foliage structure; stems semi-upright and weak to medium anthocyanin colouration; large, medium to dark green leaves and intermediate silhouette; medium to high frequency of flowers, none or very weak anthocyanin colouration inner side flower corolla.
- Tubers** oval; yellow, very smooth skin; fairly yellow flesh; shallow eyes.
- Sprouts** medium, ovoid, medium to strong intensity of anthocyanin colouration and weak to medium pubescence of base; small to medium terminal bud with weak anthocyanin colouration of tip; medium root tips.
