

NICOLA Clivia x 643011 011

Maturity	= Medium early to medium late
Dormancy	= Medium long
Foliage development	= Good
Colour of skin	= Yellow
Colour of flesh	= Yellow flesh
Shape of tubers	= Long-oval
Shallowness of eyes	= Shallow
Size of tubers	= Large
Yield	= Very high
Dry matter content	= Good to medium
Cooking type	= Firm
Suitable for	= Fresh consumption
Resistance against leafroll	= Moderately resistant
Resistance against virus A	= Resistant
Resistance against virus X	= Resistant
Resistance against virus Yn	= Good resistance
Resistance against leaf blight	= Susceptible
Resistance against tuber blight	= Fairly good resistance
Wart disease (fysio 1)	= Resistant
Resistance to potato cyst nematode Ro1	= Resistant
Common scab	= Fairly good resistance
Resistance against internal bruising	= Fairly good resistance

Morphological characteristics

- Plant** medium to tall and stem type foliage structure; stems semi-upright to spreading and none or very weak anthocyanin colouration; small to medium, light to medium green leaves and closed to intermediate silhouette; low to medium frequency of flowers, none or very weak anthocyanin colouration inner side flower corolla.
- Tubers** long-oval; yellow, smooth skin; yellow flesh; shallow eyes.
- Sprouts** medium to large, broad cylindrical, strong intensity of anthocyanin colouration and strong pubescence of base; medium to large terminal bud with medium to strong anthocyanin colouration of tip; medium to many root tips.
